Etekcity® Mini Camping Stove
User Guide

Thank you for purchasing this product. Our camping stove is perfect for the backpacker, hiker, hunter, or anyone else in need of a reliable cooking stove while off the beaten path. With its small size and built-in ignition, it takes portability and convenience to a new level.

Compatible canister type
- Butane-propane mixed fuel
- Threaded 7/16 NS Lindal valve (EN 417)

Instructions
- Ensure that the fuel flow valve on the stove is shut by turning it to the right.
- Screw the stove onto the fuel canister and fold out the arms.
- Open the fuel flow valve slightly by turning it to the left.
- Light the fuel by pressing the built-in ignition button or using a match or lighter.
- Adjust the fuel flow valve as needed for the appropriate flame intensity.
- To turn off the stove, shut the fuel flow valve.

Warnings
- This stove is designed for outdoor use only.
- If a fuel leak is detected, stop using the stove immediately and inspect it for damage.
- Remove the stove from the fuel canister when not in use.
- Store fuel away from heat sources and direct sunlight.
- Do not drop or puncture the fuel canister.
- Always follow general fire safety practices when using the stove.
- Use the stove only on a flat, level surface.
