

ROVERBEATS UNIFY | ETEKCITY
Bluetooth Receiver

INTRODUCTION

Thank you for purchasing the Etekcity Unify Bluetooth Receiver. This device supports Bluetooth 4.0+ EDR, providing compatibility with a greater range of mobile phones, smartphones, tablets, laptops, and many other Bluetooth-enabled devices. Combining modern electronic technology and ultimate portability, the Etekcity Bluetooth receiver offers a convenient way to connect your Bluetooth device to your car or home stereo for an enjoyable listening experience.

FEATURES AND SPECIFICATIONS

Input port: Micro USB (power)
Output port: 3.5mm audio
Bluetooth version: 4.0+ EDR, Class II
Supports A2DP AVRCP
Wireless range: 33ft (10meters)
Power input: 5V 1A DC
Battery: Lithium, 3.7V 200mAh
Dimensions: 48 x 48 x 24mm

Note: Please keep your Bluetooth device within approximately 33 feet (10 meters) of the receiver to ensure a stable connection. Follow the pairing instructions to pair with another device.

CHARGING AND SETUP

Turning the receiver on/off

- To turn on the receiver, hold the control button for 3-4 seconds until the indicator light glows blue.
- To turn off the receiver, hold the control button for 3-4 seconds until the indicator light flashes red and turns off.

Charging

- To charge, connect the included USB cable to a computer's USB port or 5V USB charger. When charging, the indicator light will glow red. When the indicator light turns off, charging is finished.
- The receiver can run up to 10 hours per charge.
- If the receiver is currently paired when charging begins, it will reset and may lose the connection.
- When the battery power is low, the indicator light will flash red and the receiver should be recharged.

PAIRING VIA BLUETOOTH

- Turn on the receiver. It will automatically enter pairing mode, indicated by a flashing red and blue light. Activate Bluetooth on your mobile phone or other device. Scan for Bluetooth devices, and select "UNIFY". If a passcode is required, enter "0000". After pairing has completed, you will be able to play music and other audio. The indicator light will glow blue when paired.
- The control button on the receiver can play or pause audio playback when connected via Bluetooth.
- The receiver will automatically connect with the last paired device if turned off and back on, provided it is within range. If you turn off your device or the Bluetooth receiver, or the receiver goes into sleep mode after a period of inactivity, simply turn them back on to use without any need to re-pair.

CONNECTING TO AUDIO EQUIPMENT

- To listen to your Bluetooth device's audio, connect the receiver to your audio system with the included 3.5mm cable.
- If your device and the Bluetooth receiver are paired, you will hear your device's audio output through your audio system.
- This works great with car and home stereos, receivers, headphones, and many other audio systems.
- Note: If you cannot hear any audio, check to make sure your Bluetooth device is not muted or at a low volume. Also, ensure that your audio system is set to the correct source, such as AUX.
- NFC fast pairing.
Open Bluetooth and NFC in device, turn on the receiver. Place the device's NFC antenna near to NFC induction zone of receiver (Top of UNIFY, within LED light).

PACKAGE INCLUDES

- Etekcity Bluetooth receiver
- User guide
- 3.5mm audio cable
- 3.5mm to 2RCA cable
