QUICK START GUIDE
1. First Time Set Up     2. Setting Up the Clock     3. How to Program a Timer

Questions or Concerns? (855) 686-3835 • support@etekcity.com

1 First Time Set Up
Plug in the timer outlet to a powered electrical socket, and press the reset button (R). The screen will turn blank, then will show the reset display.

2 Setting Up the Clock

NOTE: The default setting for the clock is 24-hour time

1. Press and hold for 2 seconds until the hour digit starts to flash.

2. Once the hour digit starts flashing, press or to select the hour.

3. Press , and the minute digits will start to flash. Press or to select the desired minutes.

4. Press a second time, and the days at the top of the display will start to flash. Use or to select the desired day.

5. Press a third time, and the hour and minute digits will start to flash simultaneously. Press or until the “AM” or “PM” symbol appears on the display; this indicates that the clock is on 12-hour time.

NOTE: If the “AM” or “PM” symbol disappears, then the clock is on 24-hour time.

6. Press when you have finished setting up the clock.

(See next page on how to set up the Daylight Savings Clock & How to Program a Timer.)
5. To activate your programmed timers, press and hold for 2 seconds until the “AUTO” symbol appears on the display.

NOTE: The timer outlet must read “AUTO OFF” for the programmed timers to activate. If the display reads “ON,” press once and the display will now show “OFF.” Once the display shows “OFF,” press and hold the until the “AUTO” symbol appears.
