LASERGRIP 1080
Infrared Thermometer

User Manual

Questions or Concerns?
Please contact us Monday through Friday 8:00 AM - 6:00 PM PST at (855) 666-3635 or email support@etekey.com

Operation
Surface Temperature Measurement
NOTE: The LaserGrip cannot measure the temperature of objects behind glass. Infrared energy may also occur when exposed to steam, dust or any other contaminants in the air.
1. Once the battery is properly installed, press the measurement trigger to activate the device.
2. Point the LaserGrip towards the surface of measurement.
3. Press and hold the measurement trigger and the laser will activate for aiming guidance.
4. Keep holding the trigger as you move the LaserGrip to where you wish to view or scan the surface area for temperature measurement.
5. Once the laser is pointed to the desired point of measurement, release the trigger and the LCD display will lock the calculated temperature.
6. Press the measurement trigger once again to make another measurement.

HELP for continuous temperature reading
RELEASE to lock the temperature result

NOTE: The LaserGrip LCD will display 11°F when the measured temperature is above the measurable range, and will display 0°F when the measured temperature is below the measurable range.

Unit Conversion
To switch between units of temperature measurement, press the “L/C” button at any time while the LaserGrip is on.
