Safety Information

IMPORTANT: Please read and comply with all of the instructions and warnings provided in this manual before using the product. Failure to comply with the instructions and warnings provided herein may result in inaccurate results and/or damage to the product itself.

- Always place the scale on a hard, dry, and flat surface before measurement in order to ensure accurate results.
- Dirt, dust, vibration, wind, air currents, and electromagnetic interference may contribute to inaccurate results.
- **DO NOT** exceed the 11 lb (5 kg) weight capacity; doing so may damage the scale. An overload indicator will appear on the LCD display if the limit is exceeded.
- Avoid exposing the device to damp environments or extreme temperatures.
- **DO NOT** immerse the scale in water or corrosive liquids. If a liquid is spilled on the digital display or buttons, immediately wipe the scale clean with

a soft cloth in order to avoid potential internal damage.

- When replacing batteries, make sure to insert them under the correct polarity as indicated within the battery compartment.
- If the low battery indicator is displayed, please replace the batteries.
- **DO NOT** mix new and used batteries to power the device.
- This scale is not intended for commercial or heavy-duty use.
- Handle the scale with care. Keep the scale in a cool, dry environment.
- If the scale fails to turn on, check if the batteries are installed correctly. Replace the batteries if necessary.
- If the scale is not in use for an extended period of time, remove the batteries to extend the scale service lifetime.

Set-Up

The included CR2032 Lithium batteries are preinstalled in the scale. Open the battery compartment cover located on the backside of the scale and remove the plastic strip from the battery compartment to allow the batteries to power the device. Reapply the battery compartment cover.

NOTE: The positive side of the battery should be facing up.

Operation

1. Place the scale on a flat, dry surface.
2. Press **⏻/T** to turn on the scale.
3. Press **UNIT** to select your desired measuring unit.
Then wait until the screen displays zero before measuring.

NOTE: If the screen does not display zero automatically, press the '**⏻/T**' button to auto-adjust to zero.

4. Gently place your desired object in the center of the weighing platform. The LCD display will automatically display the object's weight.
5. Hold down **⏻/T** for 2 seconds to turn off the scale.

NOTE: The scale will automatically turn off after one minute of inactivity.

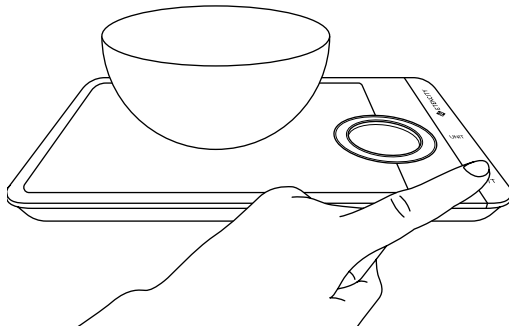

Tare Function

The tare function allows you to measure objects in a container without the having to include the container's weight in the final measurement.

1. Place the scale on a flat, dry surface.
2. Power on the scale and wait for the display to read zero.

3. Place an empty container on the scale and press **⏻/T**. The display will now show zero.

4. Place objects in the container, and the display will show the net weight of the items.

5. Take all items off the scale; the display will show the weight of the container with a negative weight.

6. When this happens, press **⏻/T** and the display will clear to zero. You are now ready to weight another object

7. If you are finished using the scale you can turn off the scale by holding down **⏻/T** or allow the scale to automatically turn off.

Maintenance

Use a slightly damp cloth to clean the surface of the scale, followed by a dry soft cloth to wipe away the remaining moisture. You can also use a dry soft cloth to wipe off any dust that may be on the scale. Be sure not to wash the device or immerse it in water or any other liquids.
