

## Sharing Devices

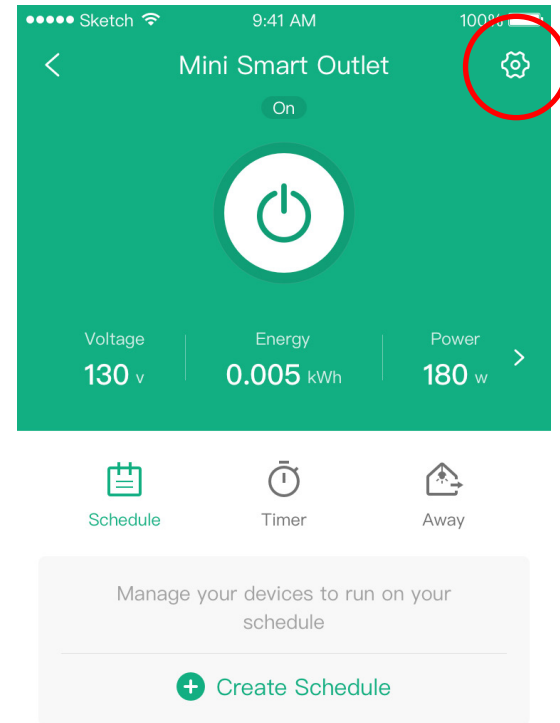

You can give other VeSync users permission to control your smart outlets by sharing your device with them.

# Sharing Devices

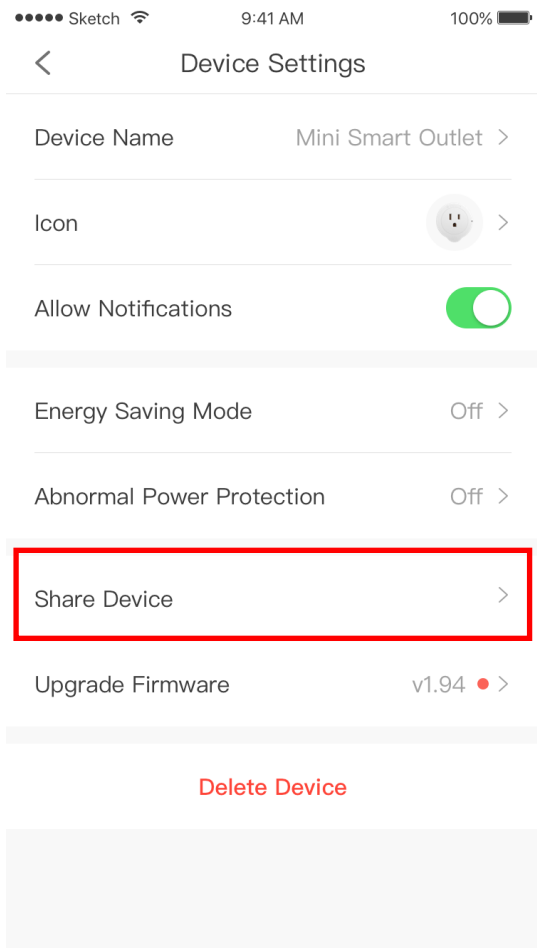

**Note:** To share devices, both users must have their own VeSync account.

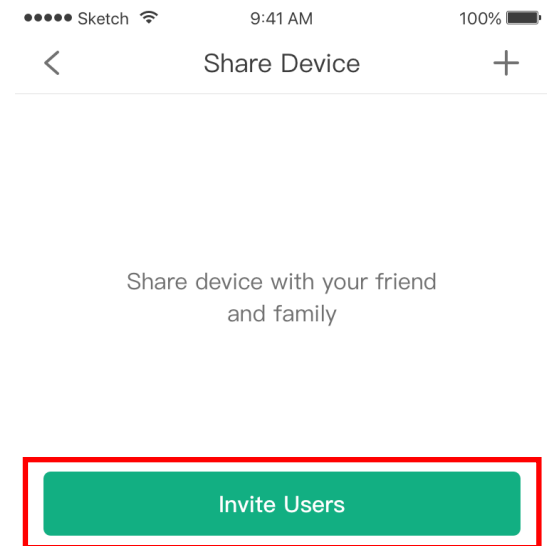

1. Tap the name of the outlet you would like to share.

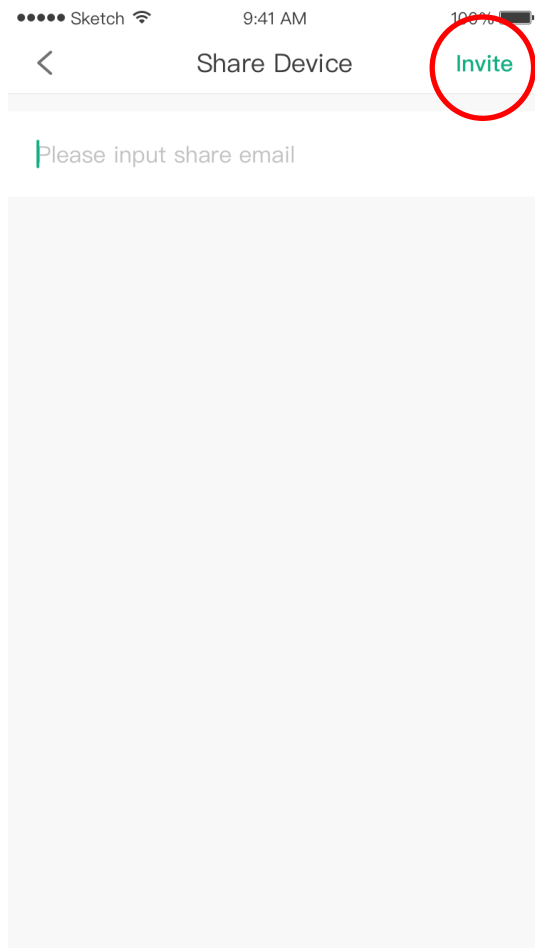

2. Tap  in the top right corner to open "Settings"

3. Tap **Share Device**.

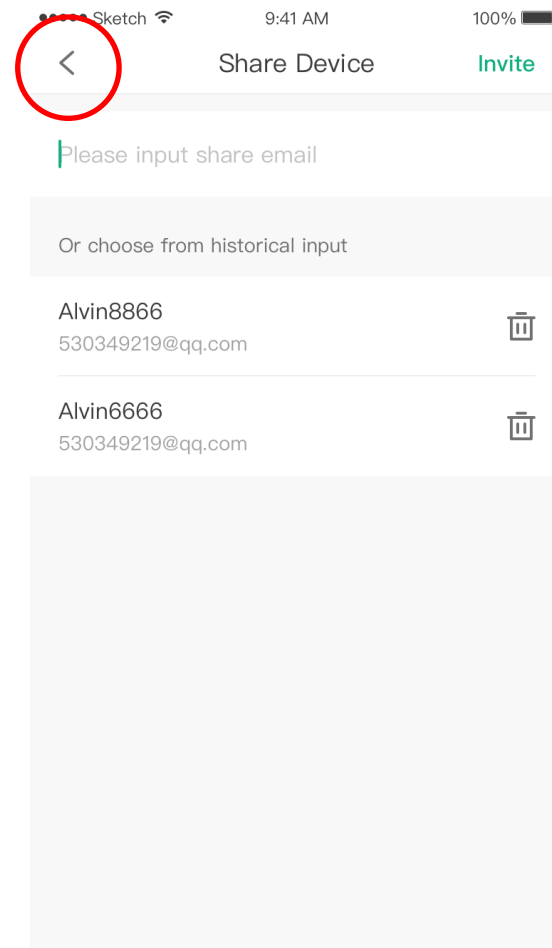

4. Tap **Invite Users**.

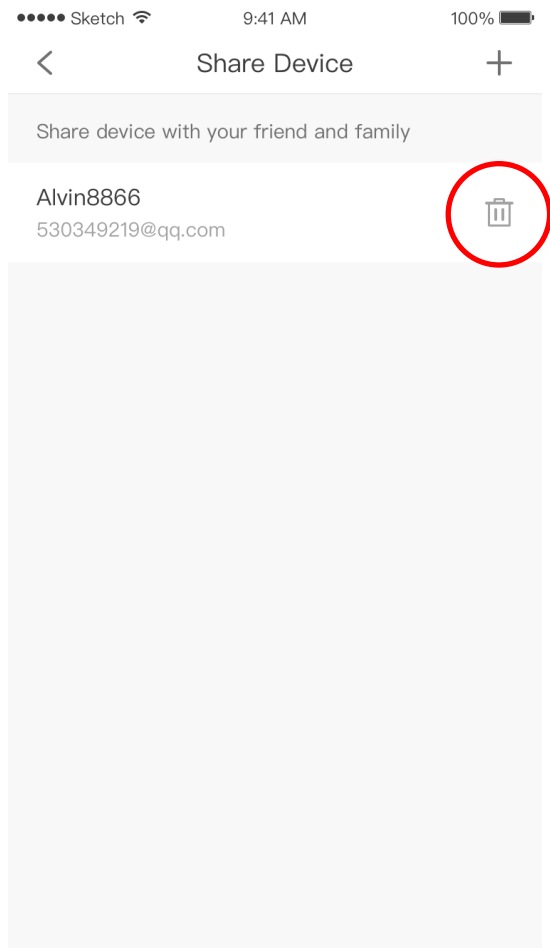

5. Type the email address of the user you want to share your outlet with. Then, tap **Invite** in the top-right hand corner.

**Note:** The other user must also have their own VeSync account. The other user will receive a notification that you have shared an outlet with them. The user's information will be saved to the app history.

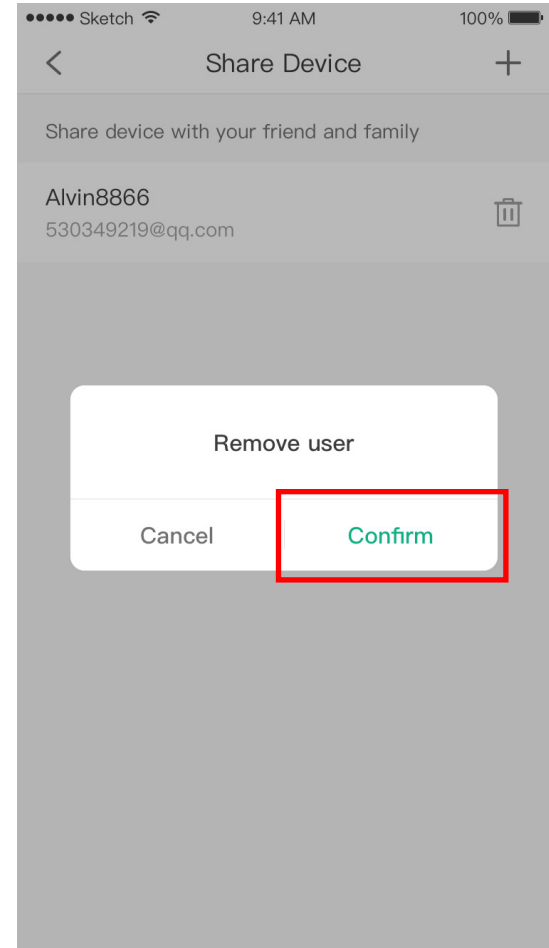

6. Tap < when you're done inviting users.

**Note:** Users you've shared your outlet with cannot edit or delete the outlet's settings.

7. You can remove a user from the outlet by tapping  next to their name.

8. Tap **Confirm**.

**Note:** Once you have removed a user, they can no longer access your outlet in any way.

# Customer Support

If you need any help or have any questions about your smart outlet, please contact our helpful Customer Support Team. Your satisfaction is our goal!

**Toll-Free:** 855-686-3835
